CONTENTS

Differential contributions of serotonin receptors to the behavioral effects of indoleamine hallucinogens in mice

Salvia divinorum use and phenomenology: Results from an online survey

Mystical experiences occasioned by the hallucinogen psilocybin lead to increases in the personality domain of openness

Reaching out towards cannabis: Approach-bias in heavy cannabis users predicts changes in cannabis use

The administration of psilocybin to healthy, hallucinogen-experienced volunteers in a mock-functional magnetic resonance imaging environment: A preliminary investigation of tolerability

4-Bromo-2,5-dimethoxyphenethylamine (2C-B): Presence in the recreational drug market in Spain, pattern of use and subjective effects

CONTENTS

A translational behavioral model of mood-based impulsivity: Implications for substance abuse
Analyses related to the development of DSM-5 criteria for substance use related disorders: 1. Toward amphetamine, cocaine and prescription drug use disorder continua using item response theory

Factors affecting cognitive function of opiate-dependent patients

Effects of group exposure on single injection-induced behavioral sensitization to drugs of abuse in mice

Contrasting effects of d-methamphetamine, 3,4-methylenedioxymethamphetamine, 3,4-methylenedioxyxpyrovalerone, and 4-methylmethcathinone on wheel activity in rats

Correlates of amphetamine-type stimulant use and associations with HIV-related risks among young women engaged in sex work in Phnom Penh, Cambodia

PHARMACOLOGY, BIOCHEMISTRY AND BEHAVIOR
VOLUME 100, NUMBER 3, ENERO 2012

CONTENTS

High impulsivity in rats predicts amphetamine conditioned place preference

Differential behavioral profiling of stimulant substances in the rat using the LABORASTM system

Amphetamine modifies ethanol intake of psychosocially stressed male rats

Effects of muscimol, amphetamine, and DAMGO injected into the nucleus accumbens shell on food-reinforced lever pressing by undeprived rats

GABA\textsubscript{A} and dopamine receptors in the nucleus accumbens shell differentially influence performance of a water-reinforced progressive ratio task
Withdrawal from repeated treatment with ethanol induces a protracted decrease in novelty-seeking behavior and enhancement of environmental habituation in mice.................................................................525
CONTENTS

Drug interactions between common illicit drugs and prescription therapies

Sustained-release opiate blockers for treating heroin and amphetamine dependence

A comparison of rural and urban nonmedical prescription opioid users’ lifetime and recent drug use

The substance use among forensic psychiatric patients

In vivo evidence for low striatal vesicular monoamine transporter 2 (VMAT2) availability in cocaine abusers
